**Features:** This pump features two tool connections and two tool simultaneous use.

The Mach III Mini Simo has two separate pumping circuits that operate independently.

This pump is available with either a Honda gas engine or a 220 VAC electric

motor. The Mach III Mini Simo has our patented Overdrive feature. This feature

allows one tool to be used at twice the speed by combining the flow from both pump circuits

into one, giving that tool more power to cut or spread.

**1936 NFPA**  
**ISO 9001**  
**TUV**
